13.4	18

HOW TO MEASURE

STEP #1

Place a piece of paper on a hard floor with one end to the wall. Stand up straight on the piece of paper with the heel slightly touching the wall.

STEP #2

Mark the end of your longest toe with a pencil for both feet. Tip: It's easier if you let someone help you with this.

STEP #3

Measure your marking from the wall (heel) to the longest toe for both feet. Take the larger of the two foot length values and compare it with our sizing chart, to define your Reebok Work shoe size.
